Product Summary

Backlit glass; Panorama backlit led lit walls gives high impact feature lighting to interiors.

Product Description

Panorama™ **Backlit glass** walls are used to create stunning high impact environments. They typically consist of toughened back-printed glass face panels, a suitable MegaLED designed LED lighting system and engineered lift and drop fixing systems. All this means Panorama™ Backlit walls are durable, easy to maintain and practical to install.

Panorama™ Backlit graphic walls | Options and Formats:

Panorama™ **backlit glass walls** are supplied as a complete product solution ideal for creating impressive corporate or architectural feature lighting in communal areas. Producing a Panorama™ backlit glass wall typically starts with MegaLED assisting the customer in sourcing or creating a super-high resolution panoramic

image whilst taking into consideration the most effective system for backlighting the image.

Dimming Options: DMX, 0-10V, Dali, Stand Alone.
