Product Summary

MegaLED LED Light fixturing service allows for fast and easy installation of cove lighting, accent lighting, pelmet lights etc.

Product Description

When you need to install your linear led lights with ease, speed and total peace of mind, MegaLED have the perfect solution. We offer a brilliant LED Lighting fixture service for installers and people who want to install Linear LED Strips or LED Tapes in the fastest and most practical ways.

Working with our own lighting profiles, top quality LED Strips, cables, power supplies and dimmers, MegaLED can help supply you linear led lights ready to install and correctly specified. This means all your lights are cut to the exact lengths required, mounted to suitable profiles and supplied with the right cable lengths or leads pre-soldered too.

LED Fixturing Service | How it works:

> Simply arrange a free consultation with MegaLED lighting applications specialist

who will discuss your project or application in the detail required to...

- Help you work out the best linear lighting options and propose the easiest to instal.
- Help propose a solution from over 10 lighting fixture profiles available.
- Help supply quality where we ensure all lights are tested and correctly heat sinked.

Explain easy ways you can install led strips and led tape rapidly, we can help cover best practice fixing methods and lighting techniques in the process. Help you specify and select a quality LED Light source. Note all our led strips feature bin graded leds, this means they are traceable and of highest consistency. Finally, we can discuss and propose best cabling, power supply and dimming options

quoting you a complete installation package at unbeatable value.

Dimming Options: DMX, 0-10V, Dali, Stand Alone.
