Product Summary

MegaLED OEM Sign Lighting Modules - Single LED module, Super Slim, IP66, 0.72W, 12VDC

Product Description

OEM

SIGN LIGHTING MODULE 0.72W

Economic, Single LED Sign Lighting Module, Ideal to illuminate narrow sign shapes.. A modern energy efficient and almost maintenance free solution making this product line a favourite of the signage industry, with flexibility to cover a range of advertising applications, such as illuminated sign letters, built up characters and

back-lit light boxes.

These 12V DC, LED modules are supplied in strings of 20/30 units with 100mm 0.5mm² multi-core cable ensure sufficient distance for complex shapes/bends whilst maintaining uniform lumen output. Sign Lighting modules can easily be connected by adding further units and feature: Pre-drilled mounting holes & industrial-grade adhesive backing for ease of installation. With **IP66 rating** these sign lighting modules are ideal for both interior/exterior applications, whilst 20,000 hours rated like make almost maintenance free. **ABS encapsulation** ensures anti-static, flame-retardant and weather-proofness. The PMMA lenses on the lighting modules give a super-wide **160° beam** angle for a uniform lumen output. Available in a range of colours with white @ 6500K being most popular.
